

"how to smoke a joint"

"how to smoke a joint"

when you smoke a joint available time
and the frequency you take the time
may differ

altogether with that
also the quality of the experience
may differ

there are three types of joints
you can roll with paper

1. pure enjoyment joints; take more time, but taste sweeter

- grind enough blossom of the cannabis plant with your fingers (save the seeds)
- take a little piece of tobacco (which you won't smoke)
- roll with paper carton an inhaling tip
- take out a slim rolling paper with the gummy side 'up' facing you
- put the inhaling tip and the little piece of tobacco at the extreme left in the middle
- put the grind blossom in the middle of the rest of the rolling paper
- roll with your hands the total in the middle of the rolling paper to a joint
- lick the gummy side with your tongue
- and close your pure enjoyment joint with your hands

2. workaholic joints; are easy to make, but take some time

- grind more than enough blossom of the cannabis plant with your fingers (save the seeds) and put it in a bag
- take 35 to 50 % of tobacco
- roll with paper carton an inhaling tip
- take out a king size rolling paper with the gummy side 'up' facing you
- put the inhaling tip at the left and the tobacco in the middle of the rolling paper
- put the grind blossom from left to right in the middle of the rest of the rolling paper
- roll with your hands the total in the middle of the rolling paper to a joint
- lick the gummy side with your tongue
- and close your workaholic joint with your hands

3. junkaholic joints; are straight forward, without thinking

- grind the weed with your grinder
- take 60 to 80 % of tobacco
- roll with paper carton an inhaling tip
- take out a king size rolling paper with the gummy side 'up' facing you
- put the inhaling tip at the left and the tobacco in the middle of the rolling paper
- put the grind weed from left to right in the middle of the rolling paper

- roll with your hands the total in the middle of the rolling paper to a joint
- lick the gummy side with your tongue
- and close your junkaholic joint with your hands

so first you'll have to decide whether you are in a hurry
or whether you can take it easy and have the opportunity
to add 'something to drink' next to smoking your 'joint'

for example:

when smoking pure enjoyment joints one prefers to have
black coffee and a surplus of crystal clear tap water
using cannabis this way feels like 'drinking' and also has medical purposes

when smoking workaholic joints one only drinks some water, tea or coffee,
but doesn't need the surplus of crystal clear tap water
using cannabis that way feels like 'relaxation' and also has bad health effects

and when smoking junkaholic joints one doesn't even have to drink anything
no coffee, no tea, no water, maybe just beer, because you are still being foolish
and want to try the bad medicine as well
using weed that way feels like 'dry mellow sunshine' and also has bad health effects
